CONNECTAINER[®]

A REVOLUTION IN YOUR LOGISTIC

Connectainer®

PILLARS

Keep **STANDARD** as
much as you can

Make the things
SIMPLE

Work to improve
EFFICIENCY

Be
**ENVIRONMENTALLY
FRIENDLY**

A large white wind turbine stands on a green grassy hill under a clear blue sky. The turbine has three blades and a tall tower. The background is a bright, clear sky with a few wispy clouds.

Connectainer[®] is

EFFICIENT

HUGE IMPACT IN THE CONTAINER IMBALANCE

Over 24% of worldwide containers moved every year are EMPTY. With only a 15% of CONNECTAINER in your stock could reduce a 80% the container imbalance in the route*

YOU MANAGE YOUR STOCK

Forget about saying ...“I don’t have equipment for your cargo”... Only connect or disconnect to have 20 or 40 feet, depending of your customer demand

IMPROVE YOUR OPERATIONS

Less quantity of empty units means less operation time, less stay at ports and less vessels used for empty repositioning

* Information based in own calculations, and depending of factors as quantity of stock, correct use, etc.. . Ask for more information about how we get this numbers.

Connectainer[®] is **STANDARD**

NORMAL REPARATION

Build with standard pieces, you can repair with same providers and cost that current units, anywhere!!

RESISTANT

Same specifications as a current 20 or 40 feet container standards, with only few improvements

MAINTENANCE

Durability of the electronic is assured, even in salt environment. Anyway we have consider an annual cost of maintenance that is totally covered with the savings

EASY SOFTWARE CONFIGURATION

Only few changes in the EDI messages from Depots are enough for controlling when and where the units are joined or separated, assuring the traceability

Connectainer[®] is

ENVIRONMENTALLY FRIENDLY

HUGE EMISSIONS REDUCTION

A minimum of 6Kg/TEU CO₂ is expended at port during handling operations. Even not having in account the empty transport emissions footprint, a huge reduction in PORT EMISSIONS can be achieved with the reuse of the empty units as 20 or 40

NEW REGULATIONS ACOMPLISHMENT

IMO strategy is focused in reduction of CO₂ emissions in further years. CONNECTAINER could help to accomplish with the target fixed, without a huge investment

MARKETING ASSET

More a more, Customer are giving priority to collaboration with eco-friendly companies in their logistic

Connectainer[®] is

SIMPLE...

UNIQUE NUMBER, ALWAYS

You will accomplish with all worldwide customs regulations, as units will always have 1 number, unique and unrepeated

NO BATTERIES NEEDED

As there is NO CONSUMPTION. Our resistant E-ink display technology makes possible to avoid continuous powering needs

“PLUG AND PLAY”

Easy to connect or disconnect. Around 35 minutes with 2 persons is enough to have your units ready, and the numbering change automatically

INCREASING CUSTOMS SECURITY

Automatic numbering change, non human action. Displays configuration make impossible to manually modify it, avoiding illegal actions

... And **MORE**

A highlight of the benefits...

REDUCTION OF YOUR GLOBAL STOCK IN A 13%

You don't need to build more 40'HC, only ask for having 20'HC CONNECTAINERS and optimize the use of the units as 20 or 40 feet, depending of the demand.

LIMITED STOCK REPLACING PROGRAM

You should only replace up to 20% of your stock with CONNECTAINERS. It can be progressively replace based in your current "old equipment replacing plan"

LOW INVESTMENT AND IMPRESIVE R.O.I.

Cost production control and adequate use could assure a MINIMUM R.O.I. of 28% per YEAR*
